

3D Printing lab

- The Ultimaker 3 Extended is a tall build, dual nozzle 3D printer, designed to provide either dual material, soluble support material or dual colour 3D printing.
- The Ultimaker 3 Extended comes with two types of swappable print cores, for build (AA) and support (BB) materials.
- The Ultimaker 3 Extended has a tall build volume of up to 300mm in height and a maximum of 215mm in XY dimensions.
